

Ezra Stone

Orlando, FL — ezrastone993@gmail.com — GitHub — LinkedIn

Education

University of Central Florida

Expected May 2026

B.S., Computer Science

Relevant Courses: Data Structures & Algorithms, Object-Oriented Programming, AI/ML, Cybersecurity Fundamentals

Experience

M365 Administrator — Fig Cyber Solutions, Marianna, FL

June 2022 – Present

- Managed hybrid cloud and on-premise email server environments.
- Created and managed Microsoft Teams for internal communication.
- Developed and maintained SharePoint sites, monitored threats and system errors, and ensured appropriate access levels.
- Implemented technical architecture including server infrastructure, security measures, and integrations.

Research & Development Contributor — Air Force Research Laboratory / Space Force Project

- Developing a web-based platform to visualize OpenEvolve metrics and graphs.
- Built a chatbot to assist users in generating and understanding `evaluator.py` and `init_program.py` scripts.
- Conducting research on OpenEvolve to enhance algorithm development for uncorrelated track processing.
- Applied C/C++, Python, and AI techniques to support algorithm design and project objectives.

Technical Skills

- **Programming Languages:** C, C++, C#, Python, Java, JavaScript, TypeScript, HTML, CSS, Bash
- **AI / Machine Learning:** OpenEvolve, Pandas, TensorFlow, PyTorch, OpenAI GPT Models (ChatGPT API), LangChain, Rasa, Dialogflow, Prompt Engineering
- **Tools & Technologies:** Git, GitHub, Docker, Visual Studio Code, Postman, npm, pip, CMake, Microsoft Office Suite, SharePoint, Teams
- **Operating Systems:** Linux, Windows, macOS

Projects

Recipe Generator AI/ML, Next.js, MongoDB, React, Express, JavaScript, HTML/CSS

- Web app suggesting smart ingredient substitutions using AI, considering dietary restrictions, allergens, and flavor compatibility.
- Analyzes input ingredients to maintain taste and texture of dishes.
- Intuitive interface helps reduce food waste and explore new culinary possibilities.
- **Technologies:** AI/ML, Next.js, MongoDB, React, Express, JavaScript, HTML/CSS

State Space Visualizer – Tower of Hanoi

- Interactive web visualization of all possible states and moves.
- Helps users understand algorithms and problem-solving strategies through dynamic visualization.
- **Technologies:** JavaScript, HTML/CSS, React
